## NAME

subusersudo − run a command as the given subuser

## SYNOPSIS

**subusersudo** username command

## DESCRIPTION

Runs the given command as the given subuser. The named user must be a descendant of the calling user.

For an overview of how the subuser tools interact and how they keep track of what users “belong” to whom, see subusers(7).

## OPTIONS

username
: the username of the subuser to run the command as.

command
: the command to run as the given subuser.

## FILES

**/etc/subusers**
: the file containing the ancestry relationships between users.

## AUTHOR

Phil Snowberger (psnowber (at) cse.nd.edu)
